

CLP have used Achilles services since 2003, as part of the Asia Pacific Utilities Group (APUG). In 2007, Achilles provided CLP with a solution to address the accuracy of supplier data across their entire supply chain.

CLP Power Hong Kong Limited - Asia Pacific

Delivering Results through Effective ERP Integration

Overview

CLP Power Hong Kong Limited (CLP Power) is the principal subsidiary of CLP Holdings, which is one of the largest utility investor-operators in the Asia Pacific region, with interests in Hong Kong, mainland China, Australia, India, Thailand and Taiwan.

One of the challenges facing CLP Power was to maintain the quality and accuracy of supplier information across their entire supply chain. In particular CLP wanted:

- A centralised supplier database
- A single point of contact for each supplier

Achilles TSMS

As existing members of the Achilles APUG service, (the Achilles supplier management service for the Utilities sector in the Asia Pacific region) Achilles worked with CLP Power to develop a TSMS solution. TSMS is a standard supplier registration solution offered by Achilles. CLP Power decided to build some more features, such as interface to SAP vendor master and inclusion of more CSR information, and renamed the solution unique to CLP Power as CLP SIS (supplier information system). All suppliers wanting to provide services to CLP now need to register on CLP SIS.

Achilles managed the supplier engagement process on behalf of CLP Power, to ensure that all suppliers updated their information, leaving CLP Power with an updated vendor database.

Changes to the vendor data are now updated daily via a data interface between Achilles and CLP SAP back-office ERP system. Any new vendors are created via the CLP SIS registration form, which includes the collection of banking details to enable vendor set-up in SAP.

As with other TSMS solutions, the registration process also assessed the risk associated with the products and services provided by each supplier, with a 3-tiered model, specific to CLP Power;

- Level 1 : Basic registration only via CLP SIS registration form
- Levels 2 & 3 : Full registration in APUG which allows:
 - Provision and validation of more detailed information
 - APUG SIS corporate responsibility initiatives

The Results

- Single global view of supplier data for both existing and new potential vendors
- Improved quality and accuracy of vendor master data
- Supply chain risk management (& reduction) through tiered approach to category risk

services for sustainable procurement
global resource. local skills.

CLP Power Hong Kong Limited is a member of APUG, the Achilles supplier management service for the utilities sector in the Asia Pacific region. For more information on APUG, please visit www.achilles/APUG
