

“The basic registry guarantees the legal capabilities of all the enrolled companies”
 Víctor Jiménez, Procurement Manager, Metro de Madrid

Metro de Madrid - South Europe

Ensuring compliance with legal frameworks

Overview

Metro de Madrid is one of the most important European companies of metropolitan transport, with nearly 686 million people using the Metro network last year.

Metro de Madrid is entrusted with the operation of the Metro network lines in service, planning and improvements related to the quality of the transport service, and the maintenance and optimisation of Madrid's underground network facilities.

Faced with changing laws and regulations within the Public and Regulated sector, Metro de Madrid needed to modify and develop a new policy for the registration of Suppliers, to ensure compliance with these revisions to the procurement legal framework.

The Solution

As a founding member of the Achilles transport suppliers service proTRANS, Achilles worked with Metro de Madrid to define a solution (TSMS) that ensured compliance with the legislation changes, and supporting the procurement policy of Metro de Madrid.

Using TSMS, existing and potential suppliers to Metro de Madrid can register in line with the size of contract;

- Basic registration for those suppliers with smaller contracts.
- Achilles proTRANS registration level for all larger suppliers. Those registered at this level complete the Achilles proTRANS pre-qualification questionnaire, in line with the higher degree of contract risk they pose to Metro de Madrid.

TSMS provides Metro de Madrid with significant benefits;

- One system for the management, validation and updating of all its suppliers
- A tiered registration level to manage the risk of small and larger contracts
- An interface with Metro de Madrid SAP system to ensure compliance of process internally within Metro de Madrid

services for sustainable procurement
global resource. **local** skills.

Metro de Madrid is a member of proTRANS, the Achilles supplier management service for the transport sector in Spain.
