

Link-up Periodic Update (2.5.7) – September 2011

Enhancement to the Link-up System

As part of Achilles' ongoing commitment to improve the supplier and buyer experience, we are pleased to announce the launch version 2.5.7 which besides technical upgrades and smaller changes in the wording and usability will deliver the following amendments to the Link-up system. We hope you find the changes valuable.

Product Code Changes

One additional code has been added to the Link-up product codes as detailed below. Please refer to Version 82 of the Link-up Product Code Booklet, which will be available to download immediately on release of the system upgrade.

19 - Rail Vehicles (Passenger & Freight)

1901.1009. SER - Stabling and Storage of Rolling Stock Off Network Rail Managed Infrastructure – New level 3 product code, type R (Registration)

Supplier Questionnaire Amendments

Within the Supplier Profile Questionnaire, the following sections are being amended as detailed:

Financial & Legal (SS3) – an extension has been made to the policy number fields for insurances to allow full numbers and excess policy details to be added.

Quality Assurance (SS4) and Environment (SS6) – as these sections refer to the ISO 9001 and ISO 14001 respectively, they are now listed next to each other in the questionnaire to make completing and updating them easier for the supplier. The question references (SS4 and SS6) will remain unchanged.

Environment (SS6) – the ability to select "No Expiry Date" for ISO 14001 has been added.
