

Achilles FPAL Industry Governance

ACHILLES FPAL - SERVING THE OIL & GAS INDUSTRY

Established in 1996, FPAL is a service provided by Achilles and the community is managed by a Steering Group to drive industry best practice. The Steering Group includes representatives from oil majors, main contractors and suppliers. Members are sought through an open nomination process and each individual must retire after three years. They may of course offer themselves for re-election as part of our democratic process. Our Steering Committee is supported by Achilles FPAL with regular meetings and communication held with Malcolm Wilson, Oil & Gas Director Achilles FPAL.

KEY RESPONSIBILITIES OF THE ACHILLES FPAL STEERING COMMITTEE:

- Overall scope of the community
- Enhancement 'Roadmap' setting
- Fee structure / level setting
- Collective industry enhancement
- Community performance monitoring
