

The Achilles BuildingConfidence Advanced community brings together buyers and suppliers in the UK Construction sector.

Designed to meet industry and government standards, our BuildingConfidence Advanced community helps buyers reduce risk and the burden of pre-qualification on their supply chain, with 80% of industry spend going through the community.

In a truly connected world, better performing supply chains benefit everyone. Our data validators provide us with volumes of high quality data to help you mitigate risk, improve working conditions and increase sustainability. As a result, suppliers are better placed to win new business and our buyers are able to procure with complete assurance.

When assurance isn't an issue business moves faster – so we've created solutions that drive sustainability and improve business performance.

Thanks to our rigorous, industry-specific prequalification processes, buyers know they're choosing from suppliers who can meet industry standards.

This is the right solution for you to:

- Reduce Overheads
- Improve the Tendering Process
- Measure Supply Chain Performance
- Improve Supply Chain Competency
- Carry out On-Site Audits
