

# Responsible Sourcing

Powered by Achilles

**As responsible sourcing becomes more important, we're here to help you verify that your business values are echoed across your supply chain.**

---

Being assured that your supply chain not only holds but also demonstrates the responsible sourcing standards that you abide by is essential to maintaining and growing your responsible sourcing credentials.

And with more than 25 years' experience in this field, when it comes to ensuring you have a transparent and accountable supply chain we're the name to trust.

## **Achilles Responsible Sourcing is a supplier assessment service that:**

- Helps companies identify the current compliance levels of their suppliers
- Provides objective supplier assessment via online questionnaires and audit
- Enables collaboration between you and your supply chain, to reach your joint Responsible Sourcing goals

## **Achilles also guarantees:**

- A thorough validation of supplier data before it is shared with you
- Supplier audits are conducted using industry approved protocols
- You get a clear understanding of how your suppliers are complying with legislation

## **This is the right solution for you when:**

- You need to verify health and safety, environmental, quality management and corporate social responsibility compliance
- You want peace of mind and assurance that supplier information is up to date and, where necessary, verified through an independent audit

## **We offer your suppliers:**

- Competitive global pricing model based on the number of product codes selected and region of operation
- Benchmarking and improvement practical advice and feedback
- Accreditation for high risk suppliers under the audit service
