

Green Energy

Powered by Achilles

The global renewable energy market is growing at a remarkable speed as the need for clean low-carbon energy take centre stage in the global energy mix.

Achilles Green Energy is all about facilitating the growth of renewable energy through assuring the quality of supply chains.

Our network is accessed by buyers globally to source and pre-qualify suppliers for green energy projects. Searching by product and service codes tailored for the renewable energy sector, they'll be able to view, source and select suppliers based on their project requirements.

And with more than 30 years' experience in energy supply chains, when it comes to ensuring everyone gets home from work safely, we're the name to trust.

Achilles Green Energy network is:

- Driven and informed by almost 30 years of experience in collecting and validating suppliers' data globally
- Aligned to renewable energy content requirements
- A set of verified critical financial and business data as well as essential company information

Achilles also guarantees:

- No hidden fees – safety is a right, not an expense
- Access to advanced analytics across a range of key qualification measures, including sustainability and environmental, health & safety, financials and management systems
- Validation of all supplier data before it is shared with you

This is the right solution for you when:

- You need to source and pre-qualify suppliers for green energy projects
- You need to benchmark categories or specific suppliers against the supply chain norm
- You want to understand where potential pain-points and disruptions within your supply chain might be, informing strategic supplier initiatives
- You want a common, industry-specific qualification standard, with the option of inviting selected suppliers to undergo an audit

We offer your suppliers:

- Competitive pricing
- Access to relevant green energy specific content
- Visibility to buyers using the Green Energy community
