Adding Product Codes and Key Words

Ensuring that your company registers under the product and service codes that match your capabilities is one of the most important aspects of completing the questionnaire.

The product and service codes are the primary means for buyers to source suppliers and/or contractors to match their contract requirements.

It is essential to give careful consideration and allow adequate time to review all of the available product and service codes and keywords, in order to maximise your company's chances of being identified by a buyer for a relevant contract opportunity.

Introduction

How to select Product Codes

This guide provides all the product and service codes and their associated keywords.

There are three tiers in the coding structure which are divided into the following areas:

1. Raw materials and minerals
2. Fuels, gases and chemical products
3. Semi-finished products and materials
4. Manufactured products and equipment
5. Food, drinks and consumables
6. Energy production and utility products
7. Electronics and telecommunications
8. Paper and packaging
9. Finished goods
10. General services
11. Construction services
12. Engineering and associated services
13. Maintenance, repair and facilities management
14. Consultancy services
15. Contractor services
16. Railway services
17. Resource extraction and refinement
18. Transportation, storage and logistics services
19. Turnkey services
20. Utilities and associated services
21. Waste management and cleaning services
22. Health, safety and security services

Each area is sub-divided into a number of subsections, listed on page 5.

Navigating through the Product Code tree structure

In the system, to select your product codes, you will need to navigate through a tree structure:

- Pick a Level 1 product and service code. This will then display all the available Level 2 codes.
- Pick a Level 2 product and service code. This will then display all the available Level 3 codes.
- Pick and register under the Level 3 codes that most closely reflect the products or services you supply

N.B. The number of Level 3 codes chosen may affect the subscription level that you require.
