60	3.0.0	GENERAL SERVICES
75	4.0.0	OTHER PRODUCTS AND MATERIALS

Adding Product Codes and Keywords

Ensuring that your company registers under the product and service codes that match your capabilities is one of the most important aspects of completing the questionnaire.

The product and service codes are the primary means for buyers to source suppliers and/or contractors to match their contract requirements.

It is essential to give careful consideration and allow adequate time to review all of the available product and service codes and keywords, in order to maximise your company's chances of being identified by a buyer for a relevant contract opportunity.

How to select Product Codes

This guide provides all the product and service codes and their associated keywords.

There are three tiers in the coding structure which are divided into the following areas:

- 1.0.0 BUILDING AND CONSTRUCTION SERVICES / WORKS CONTRACTS / LEASE
- 2.0.0 BUILDING AND CIVIL ENGINEERING PRODUCTS AND MATERIALS
- 3.0.0 GENERAL SERVICES
- 4.0.0 OTHER PRODUCTS AND MATERIALS

Each area is sub-divided into a number of subsections, listed on page 6 onwards.

Navigating through the Product Code tree structure

In the system, to select your product codes, you will need to navigate through a tree structure:

- Pick a Level 1 product and service code. This will then display all the available Level 2 codes.
- Pick a Level 2 product and service code. This will then display all the available Level 3 codes.
- Pick and register under the Level 3 codes that most closely reflect the products or services you supply.
