

# TRACCOS

ASSURANCE & INSURANCE

*Assured performance. Comprehensive coverage.*

POWERED BY

PROGRAM OVERVIEW

## A NEW MODEL FOR RAIL RISK

TRACCS Assurance & Insurance is a new co-branded program developed for the Canadian rail sector, combining independently verified supplier assurance with rail-specific insurance expertise.

Powered by Achilles and B Smart Insurance, the program is designed to help rail organizations better evidence contractor and supplier risk, support more informed underwriting, and create a clearer connection between how risk is managed and how it is insured.

## THE MASTER WORKFLOW

**BEYOND TRADITIONAL COVERAGE**

## **From Assumed Risk Control to Evidence-Based Assurance.**

Rail operators, agencies, contractors, and suppliers manage complex risk every day. The challenge is proving that risk is being controlled in a way that insurers, project owners, and other stakeholders can clearly understand.

TRACCS Assurance & Insurance brings assurance and insurance together in one coordinated program. Supplier compliance, competence, and performance can be independently verified, creating a clearer picture of contractor and supply chain risk. That insight can then support more informed insurance assessment, better differentiation between well-managed and higher-risk operations, and stronger long-term risk outcomes for the Canadian rail market.

## **PROGRAM INTRODUCTION**

## WHY THIS PROGRAM MATTERS

# Helping Move Rail Risk From Insurance-Led To Assurance-Led

As Canadian rail projects become more complex, the way contractor and supplier risk is evidenced is becoming increasingly important. TRACCS Assurance & Insurance supports a more mature approach by connecting verified operational data with insurance decision-making.

### Greater Risk Clarity

Create a clearer, more defensible view of contractor and supplier performance.

### Stronger Accountability

Help clarify competence, oversight, and duty-holder responsibility across the rail supply chain.

### Rail-Specific Insurance

Support more informed underwriting to produce optimized risk management.

POWERED BY ACHILLES & B SMART

## Two Complementary Services. One Connected Program.

### TRACCS Assurance

#### Independently Verified Supplier Insight

TRACCS Assurance, powered by Achilles, provides a structured view of supplier compliance, competence, and performance across the rail supply chain. It replaces fragmented or self-declared information with consistent, independently verified data that helps organizations understand who is working on the network and how risk is being managed in practice.

- ✓ Supplier prequalification and onboarding
- ✓ Audited safety and management systems
- ✓ Competence and capability verification
- ✓ Ongoing supplier monitoring
- ✓ Centralized supplier risk visibility

Powered by

### TRACCS Insurance

#### Rail-Specific Coverage For Operational Reality

TRACCS Insurance, powered by B Smart Insurance, is built around the practical requirements of rail operations, from project delivery to ongoing infrastructure and contractor risk. By using clearer assurance data, the program supports more accurate risk assessment and coverage that better reflects how risk is actually managed.

- ✓ Rail-specific coverage design
- ✓ Alignment with contract and project requirements
- ✓ Access to specialist rail underwriting expertise
- ✓ Informed assessment via verified supplier data
- ✓ Tailored coverage based on actual risk profile

CONNECTED CAPABILITY

## PROGRAM FRAMEWORK

# Clearer Evidence. Better Risk Visibility. More Informed Insurance.

The program creates a stronger bridge between operational risk management and insurance assessment. Instead of relying only on insurance thresholds, contractual controls, or self-declared supplier information, TRACCS Assurance & Insurance helps organizations demonstrate how contractor and supplier risk is being actively managed.

### Suppliers Are Assessed

Supplier systems, competence, compliance, and performance are reviewed through a structured assurance framework.

### Risk Becomes Clearer

Verified data creates a more consistent view of contractor and supply chain risk across rail projects and operations.

### Better Informed Underwriting

Insurers gain a clearer understanding of how risk is controlled, supporting more accurate assessment and pricing.

### Superior Controls Stand Apart

Well-managed organizations can be more clearly differentiated from higher-risk operations.

## BUILT FOR CANADIAN RAIL

# Structured Around the Work Being Performed.

TRACCS Assurance & Insurance is being developed around clear rail work categories, allowing assurance requirements to reflect the type and risk level of activity being carried out.

**Construction & Principal Contractor Roles**

**Rolling Stock & Depot Operations**

**Infrastructure, Civils & Track**

**On-Track Plant, High-Rail & Lifting Operations**

**Electrification, Traction Power & OCS**

**Professional, Engineering & Assurance Services**

**Signalling, Systems & Telecoms**

**Products, Manufacturing & Supply**

Higher-risk activities, including principal contractor roles and live-rail construction work, can attract enhanced audit, validation, and oversight. This helps provide a clearer view of who is controlling risk, what they are competent to deliver, and where responsibility sits.

VISIT US AT RAIL DAY 2026

## Meet the Team Launching TRACCS Assurance & Insurance

TRACCS Assurance & Insurance will be featured at Rail Day 2026, Canada's leading indoor/outdoor transit and rail trade show and conference. The event brings together transit agencies, project owners, operators, contractors, suppliers, and industry stakeholders for two days of technical discussion, collaboration, and rail sector insight.

### Event Details

Rail Day 2026 takes place June 17-18, 2026 at  
The International Centre in Mississauga, Ontario.
