Adding Product Codes and Key Words

Ensuring that your company registers under the product and service codes that match your capabilities is one of the most important aspects of completing the questionnaire.

The product and service codes are the primary means for buyers to source suppliers and/or contractors to match their contract requirements.

It is essential to give careful consideration and allow adequate time to review all of the available product and service codes and keywords, in order to maximise your company's chances of being identified by a buyer for a relevant contract opportunity.

How to select product and service codes for your organisation

This guide provides all the product and service codes and their associated keywords.

There are four tiers in the coding structure which are divided into the following areas:

1. GOODS & PRODUCTS
2. NON-ENGINEERING SERVICES
3. WORKS & ENGINEERING SERVICES
4. PRODUCTS / EQUIPMENT / MATERIALS (OIL & GAS)
5. PRODUCTS / EQUIPMENT / MATERIALS (OIL & GAS) (CONTINUED)
6. SERVICES (OIL & GAS)
7. MULTIDISCIPLINE / COMBINED SUPPLIES AND / OR SERVICES (TURNKEY / PACKAGES) (OIL & GAS)

For the Achilles Supply-Line, you will be required to select product codes at the third level. This guide provides all the product codes available to choose from.

Navigating through the Product Code tree structure

In the system, to select your organisation's product codes, you will need to navigate through a tree structure:

- Level 1 – the highest and most general category.
- Level 2 – subcategories giving a greater level of detail.
- Level 3 – individual products and services – this is the level to choose to indicate what products and services your organisation can supply
- Level 4 (keywords) – further division of the individual products and services to give a greater level of granularity– this may help buyers identify suppliers who provide a particular type of the level 3 product or service

If you are not sure which section contains a particular product code, a free text search option is available. Remember that Achilles codes are not a Bill of Materials but exist to enable buyers and suppliers to begin a conversation. The product codes may not be an exact match to the products that your organisation provides, so think in terms of 'categories' rather than specifics when looking for a code. The codes do not use trade names, so search for a generic term (sticky tape) rather than a trade or brand name (Sellotape).

For further guidance on how to select product codes, please see the

'How to join a buyer's supplier registration system'.
